

Music Store Data Analysis Using Mysql

- Payal Gimonkar
- SQL | Mysql | Data Analyst

Project Overview

- Analyze music store database
- Find customer insights
- Identify top artists and genres
- Analyze revenue and sales

Database schema

Questions

Q1) Who is the senior most employee based on job title?

USE music_store;

SELECT * FROM employee

ORDER BY levels DESC

LIMIT 1;

SELECT * FROM employee

ORDER BY levels DESC;

Result Grid

 Fetch rows:

employee_id	last_name	first_name	title	reports_to	levels	birthdate	hire_date	address	city	state	country	postal_code	phone
1	Adams	Andrew	General Manager	9	L6	18-02-1962 00:00	14-08-2016 00:00	11120 Jasper Ave NW	Edmonton	AB	Canada	T5K 2N1	+1 (780

Result Grid

Q2) Which countries have the most Invoices?

```
SELECT COUNT(*) as c, billing_country
```

```
FROM invoice
```

```
GROUP BY billing_country
```

```
ORDER BY c DESC
```

Result Grid			Filter Rows:	Export:	Wrap Cell Content:
	c	billing_country			
▶	131	USA			
	76	Canada			
	61	Brazil			
	50	France			
	41	Germany			

Result 1 ×

Output

Q3) Let's invite the artists who have written the most rock music in our dataset.
Write a query that returns the Artist name and total track count of the top 10 rock bands

```
SELECT artist.artist_id, artist.name, COUNT(track.track_id) AS number_of_songs
FROM track
JOIN album2 ON album2.album_id = track.album_id
JOIN artist ON artist.artist_id = album2.artist_id
JOIN genre ON genre.genre_id = track.genre_id
WHERE genre.name LIKE 'Rock'
GROUP BY artist.artist_id, artist.name
ORDER BY number_of_songs DESC
LIMIT 10;
```

The screenshot shows a database query result grid with the following columns: artist_id, name, and number_of_songs. The results are ordered by the number of songs in descending order. The top 10 results are as follows:

artist_id	name	number_of_songs
1	AC/DC	18
3	Aerosmith	15
8	Audioslave	14
22	Led Zeppelin	14
4	Alanis Morissette	13
5	Alice In Chains	12
23	Frank Zappa & Captain Beefheart	9
2	Accept	4

Q2: We want to find out the most popular music Genre for each country. We determine the most popular genre as the genre with the highest amount of purchases. Write a query that returns each country along with the top Genre. For countries where the maximum number of purchases is shared return all Genres. Steps to Solve: There are two parts in question- first most popular music genre second need data at country level.

```
WITH popular_genre AS (  
  SELECT  
    COUNT(il.quantity) AS purchases,  
    c.country,  
    g.name AS genre_name,  
    g.genre_id,  
    ROW_NUMBER() OVER (  
      PARTITION BY c.country  
      ORDER BY COUNT(il.quantity) DESC  
    ) AS RowNo  
  FROM invoice_line il
```

```

JOIN invoice i ON i.invoice_id = il.invoice_id
JOIN customer c ON c.customer_id = i.customer_id
JOIN track t ON t.track_id = il.track_id
JOIN genre g ON g.genre_id = t.genre_id
GROUP BY c.country, g.genre_id, g.name
)
SELECT *
FROM popular_genre
WHERE RowNo = 1;

```

Result Grid Filter Rows: Export: Wrap Cell Content:					
	purchases	country	genre_name	genre_id	RowNo
▶	1	Argentina	Rock	1	1
	18	Australia	Rock	1	1
	6	Austria	Rock	1	1
	5	Belgium	Rock	1	1
	26	Brazil	Rock	1	1
	57	Canada	Rock	1	1
	7	Chile	Rock	1	1

Result 1 ×

Output

Skill Used

- SQL
- JOINS
- SUBQUERIES
- CTEs
- AGGREGATE FUNCTIONS
- DATA ANALYSIS
- MYSQL

Conclusion

- Improved SQL Skills
- Learned business analysis
- Worked with relational databases
- Generated actionable insights
